

A thoughtful welcome, from the ground up.

pouch200° seamless indoor slippers.

For hotels, spas, salons and clinics

Refined looks and easy everyday care.
From one location to a multi-site rollout.

Clean design. Everyday practicality.

01 Seamless construction

High-frequency welding creates a seam-free finish. A thread-free construction gives the slippers a clean, simple appearance.

02 Easy to wipe clean

The surface is easy to wipe for everyday care. Please test a sample with your facility's cleaning routine before use.

03 Lightweight comfort

Experience the light feel and comfort in person. Try a sample to check fit and sizing.

04 Colours for your space

From understated tones to accent colours, discuss options that complement your interiors and brand.

About the antibacterial treatment

Existing product documentation describes an antibacterial treatment. Please confirm the treated areas, test conditions and scope of performance before placing an order.

Comfort for the spaces that welcome.

Explore the right balance of appearance, comfort and care for your setting.

01 HOTELS

For guest rooms and lounges where guests change into indoor footwear and relax. Choose a look that complements the interior.

02 SPAS

For rest areas and relaxation spaces after changing. Suggested for indoor footwear use in dry areas.

03 BEAUTY SALONS

For moments of comfort before and after treatments. Coordinate colours with your salon's identity.

04 CLINICS

For clinics, including aesthetic clinics, where visitors change footwear. Consider both a welcoming impression and ease of care.

These are suggested applications. Please check flooring, cleaning methods and sizing in advance. Suitability for wet areas and specific clinical routines requires individual confirmation.

From one location to multiple sites.

Tell us about your plans, including multi-site use. We will discuss quantities, delivery locations and requirements to help you consider the right specifications.

01 Tell us what you need

Application, number of sites, quantities and timing

02 Evaluate a sample

Colours, size, comfort and cleaning methods

03 Review your quotation

Specifications, quantities and delivery arrangements

What to include in your inquiry

Application and facility name / Number of sites / Quantity / Size and colour preferences / Desired delivery date / Delivery locations / Budget / Customisation requests

Pricing, minimum order quantity (MOQ) and lead time are quoted individually. Materials, sizes, available colours and antibacterial treatment details are subject to the latest specifications. Feasibility and terms for logos or custom colours depend on your requirements.
